

**DEC/EPA Video Conference  
May 22, 2017**

1. Hudson River PCBs site - 5 year review status
2. Grasse River Remedial Design
3. GM Massena fish data and planned follow-up
4. Peninsula Blvd Proposed Plan: Check in on any outstanding issues (hopefully all will be discussed and resolved this week)
5. Coordination between NYSDEC and USEPA on review of documents where USEPA is lead (e.g., New Cassel OU3 groundwater investigation work plan)
6. Wolff-Alport- Proposed Plan - EPA preferred remedy and timing of draft Proposed Plan review/release
7. Gowanus Canal Bulkheads
8. Grumman - Next steps. Next meeting/status of minutes; Navy write up on interim hot spot approach (Plant 6 vs use of GM 38 treatment system)
  - Next meeting/status of minutes: We will be sending out proposed dates for the next meeting within the next few days. The draft minutes will be distributed to all of the meeting attendees once we receive feedback from Martin.
  - Navy write up on interim hot spot approach (Plant 6 vs use of GM 38 treatment system): We have several comments/questions regarding the Navy's analysis that we hope to provide to the Navy in early June. We have requested that the Navy also submit a write up which evaluates the proposed RE-108 hot spot system (and the potential use of BWD Plant 6). We expect that the Navy will provide the second write up in June.
9. FMC status
10. Newtown Creek – CSOs under CWA vs. CERCLA
11. Model SSC - review/coordination
